

## ***GLS quality also run on Web! The new web site is online, ready to be discovered***

### ***GLS WEBMAIL April 2021 | Newsletter***

The new GLS website has been online since Saturday 27 March, with a redesigned look that is more intuitive and navigable.

The GLS Group has decided to harmonise the image of the website for all the countries in which it operates, in order to make it recognisable to its customers, regardless of where they access it. At the same time, some graphical and functional improvements have been made for a more streamlined and immediate user experience.

In order to be integrated into the Group's common platform, the new website address is

[www.gls-group.com/it](http://www.gls-group.com/it).

The main changes concern the graphics, which have been improved to serve the content and functionality, with particular attention to mobile navigation.

The menus have been reorganised and simplified so that users can immediately find what they need. The GLS Informa section has been added, containing the company's "latest news", such as information on Covid19 and Brexit. Finally, a number of technical improvements have been introduced for the management of shipments by customers.

***For any information or support request,  
please contact your local sales representative!***
